

# Device to safely interchange roller on a tillage equipment, from the tractor cab

- ▶ Innovative feature : patent number W0 2016/024181 A1
- ▶ Allows swapping of roller of the rear implement in less than 1 min from the cab
- ▶ Allows to optimize the roller selection depending on:
  - Weather conditions
  - Soil types
  - Crop residues
- ▶ Implement is modular and versatile
- ▶ Quick Roller Swap module can be installed on different machine brands
- ▶ Benefits:
  - Economy : implement can be used all year round → savings and simplicity for the farmer
  - Agronomy : no compromise → better agronomical performance as selected roller is always the best one for the work performed
  - Modularity : easy decision-making when buying, especially for farm equipment rings or contractors as roller can be adapted to each user
